

OMRON

Color Mark Sensor

# E3S-DC□□Series

## INSTRUCTION SHEET

Thank you for selecting an OMRON product. This sheet primarily describes precautions required in installing and operating the product.

- A specialist who has the knowledge of electricity must treat the product.
- Please read this manual carefully, and use it correctly after thoroughly understanding the product.
- Please keep this manual properly for future reference whenever it is necessary.

The following notice applies only to products that carry the CE mark:  
Notice:  
This is a class A product. In residential areas it may cause radio interference, in which case the user may be required to take adequate measures to reduce interference.

### PRECAUTIONS ON SAFETY

#### ● Meanings of Signal Words

**WARNING** Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage.

#### ● Warning Indications

### WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purpose.

Do not use the product with voltage in excess of the rated voltage. Excess voltage may result in malfunction or fire.

Never use the product with an AC power supply. Otherwise, explosion may result.

Be sure to tighten the external lens until it reaches the chassis.

### PRECAUTIONS FOR SAFE USE

The following precautions must be observed to ensure safe operation of the product.

- Do not install the product in the following locations.
  - (1) Locations subject to direct sunlight
  - (2) Locations subject to condensation due to high humidity
  - (3) Locations subject to corrosive gas
  - (4) In the place where vibration or shock is directly transmitted to the product.
- Do not use the product in environments subject to flammable or explosive gases.
- Do not use the product in any atmosphere or environment that exceeds the ratings.
- Do not pull on the cable with excessive strength.
- Do not attempt to disassemble, repair, or modify the product in any way.
- Do not use the product with the main unit damaged.
- Be sure that before making supply the supply voltage is less than the maximum rated supply voltage. (30V DC)
- Do not apply any load exceeding the ratings.
- Do not short the load. Otherwise damage or fire may result.
- Connect the load correctly.
- Do not use the product under a chemical or an oil environment without prior evaluation.
- Though this is type IP67, do not use in the water, rain or outdoors.
- Do not use thinner, alcohol, or other organic solvents. Otherwise, the optical properties and degree of protection may be degraded.
- When disposing of the product, treat it as industrial waste.
- UL Standard Certification
  1. Ambient temperature rating marked on the device or in the installation instructions.
  2. The model number of the accessory cable assembly that shall be used: Recognized XS2F-D4 Series and/or Recognized XS2W-D4 Series by Omron. The cable assembly model numbers may be individually itemized.
  3. External overcurrent protection of 1A for 26AWG, 2A for 24AWG, or 3A for 22AWG wire shall be provided for cable protection.
  4. When XS2F-D4 (connectors on one end only) cable assembly models are marked per item 2 above that have wires (or cores) less than 24AWG (0.2mm<sup>2</sup>), the instructions shall also include that those cables are for connection to terminal blocks and are not for field splicing.

### PRECAUTIONS FOR CORRECT USE

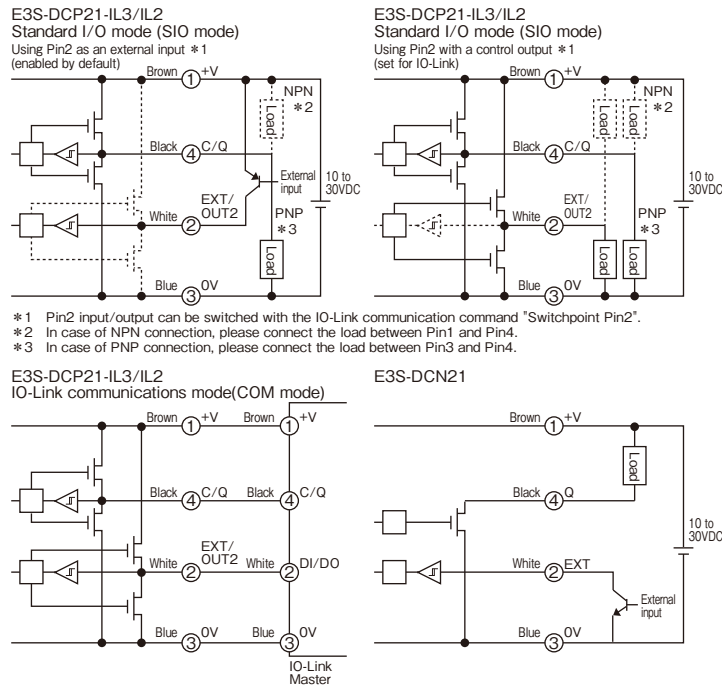

- Note that the water-resistant function is impaired if installing the photoelectric sensor by hitting it with a hammer and so on.
- If the Sensor wiring is placed in the same conduits or ducts as high-voltage or high-power lines, inductive noise may cause malfunction or damage. Wire the cables separately or use a shielded cable.
- To extend a cord in the standard I/O mode, use a cable of 0.3mm<sup>2</sup> or more and keep the length 100m or less. Keep the length 20m or less if using the sensor in the IO-Link mode.
- Apply a screw tightening torque of 2.0N•m or less.
- If a commercial switching regulator is used, ground the FG (frame ground) terminal.
- The Sensor will be able to detect objects 100 ms after the power supply is tuned ON. Start using the Sensor 100 ms or more after turning ON the power supply. If the load and the sensor are connected to separate power supplies, be sure to turn ON the sensor first.
- Do not press the button with anything sharp such as a screwdriver because it might be damaged.
- Output pulses may occur when the power supply is turned OFF. We recommend that you turn OFF the power supply to the load or load line first.

## 1 Installation

### 1-1 Dimensions

### 1-2 Input/Output Circuit Diagram

## 2 Settings

For E3S-DCP21-IL3/IL2, setting can be performed with IO-Link communication.  
Refer to the separate index list

### 2-1 Setting and Display Overview

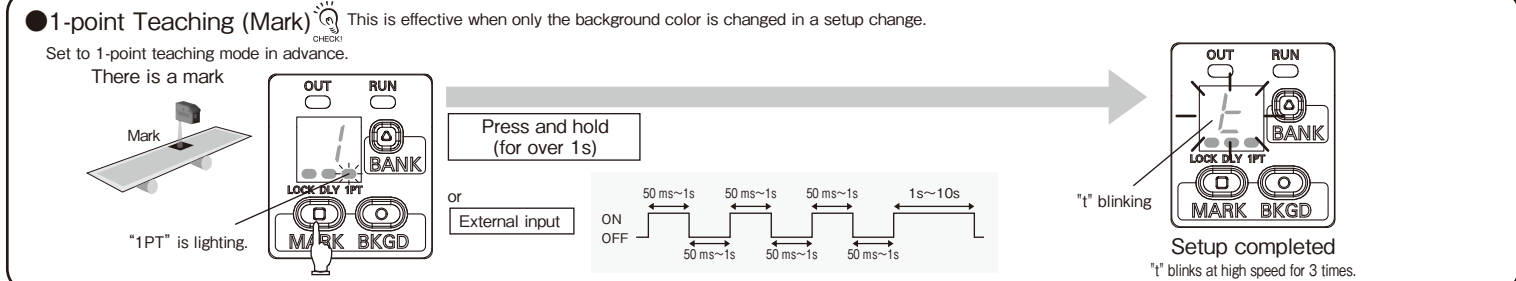

### 2-3 Teaching

#### ① Detecting if there is a mark

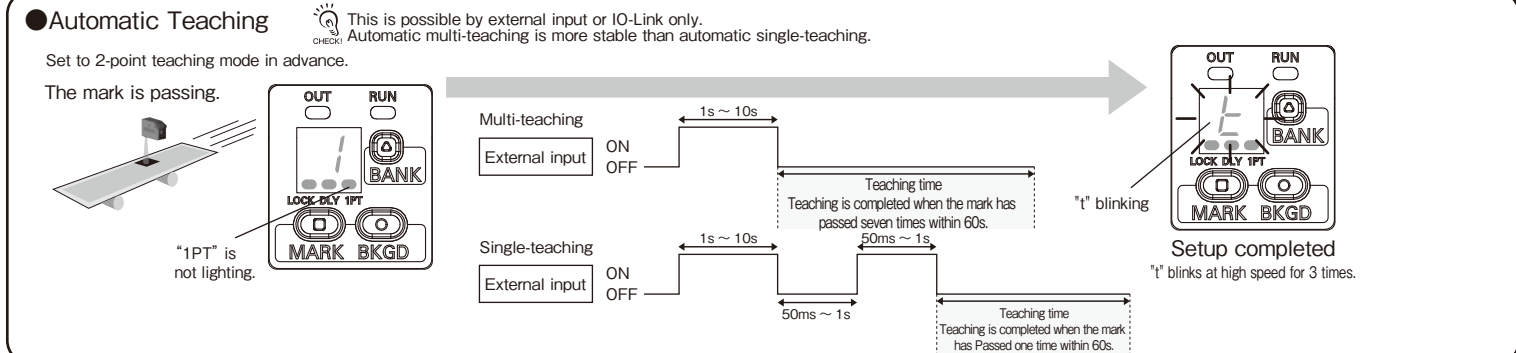

#### ② Detecting only the certain-colored mark

#### ③ Detecting only the certain-colored background

#### ④ Adjusting the setup using a moving mark without stopping the line

### 3 Convenient Setting Features

For E3S-DCP21-IL3/IL2, setting can be performed with IO-Link communication.  
Refer to the separate index list

#### 3-1 Preventing Malfunction

**● Key Lock Function** Switches enable/disable for the button input.

The key lock can be deactivated with the same steps.

Press and hold (for over 3s)

"LOCK" is lighting

#### 3-2 Delaying the output time

**● Off-delay** Sets the delay time until the output is turned OFF.

The Off-delay can be deactivated with the same steps.

Press and Hold both (for 1 sec. or longer)

"DLY" is lighting.

Sensing object

Mark

Background

Output

ON

OFF

10ms

#### 3-3 Using multiple settings separately for change-over etc.

**● BANK switching** Up to 9 (9 BANKs) of the configuring operation modes and teaching results can be saved and these settings can be switched.

A BANK is being selected.

Short press (less than 1s)

Short press (less than 1s)

After 2s

Switching completed

\*BANKs 1-9 can be set up by pressing the button in order.

or

**External input** Input pulse for the number of times of BANK number setup.

(Ex.) Set to BANK 3

ON

OFF

50ms~1s

50ms~1s

50ms~1s

50ms~1s

50ms~1s

50ms~1s

The BANK is determined after 1s or more.

Switching completed

Settings of key lock, off-delay and others are common to each BANK.

#### 3-4 Initializing settings of each BANK

**● BANK Reset** Initialize the settings of the BANK selected(Initialization for each BANK)

Change to the desired BANK to be initialized.

Short press (less than 1s)

7-segment indication blinking

Press and Hold both (for 1 sec. or longer)

Setup completed

#### 3-5 Factory-default

**● Factory-default** Initialize all settings to the Factory-default. (Initialization for all BANKs)

Initialization confirmation screen

7-segment indication blinking

Press and Hold both (for 1 sec. or longer)

Initialization completed

### 4 Maintenance

#### 4-1 Error Display

Error Name / Display*	Cause	Remedy
Internal communication error OUT RUN Blinking alternately [E-SPC]	An error has occurred on the system.	Start up the sensor again. If the error occurs again, replace the sensor.
EEPROM system area data error OUT RUN Blinking alternately [E-SSS]	Reading out or writing in the internal data has failed	Start up the sensor again. If the error occurs again, replace the sensor.
EEPROM user setup area data error OUT RUN Not lighting Blinking [E-dRL]	Reading out or writing in the internal data has failed	Start up the sensor again. If the error occurs again, initialize the setting.
Output short circuit detection error OUT RUN Blinking Not lighting [E-dUL]	Over current flowing to the control output	Check wiring and connection of the connector again.
IO-Link communications no response error OUT RUN Continuous operation Not lighting [E-LCH]	Communications with the IO-Link master has failed.	Check the connection with the IO-Link master.
Teaching error OUT RUN Continuous operation [E-LCH]	Teaching has failed.	Put the workpiece in the detection area and try teaching again.

\*Letters are displayed in order by the 7-segment indication.

#### 4-2 Ratings and Specifications

Model	E3S-DCP21-IL3		E3S-DCP21-IL2	E3S-DCN21
Input-output method	Push-pull output, input/output (selectable with IO-Link and "input" is set as default)			NPN output, input
Sensing distance	10±3mm			
Spot size (reference)	1×4mm			
Light source	RGB LED			
Power supply voltage	10 to 30VDC (including 10% ripple (p-p))			
Current consumption	960 mW max. (Reference: Power supply voltage 24V, Current consumption 40mA max.)			
Control output	Load current: 100mA max. (30V DC max.)			
External input	High: +V to +V-1.5V, within -1mA Low: 1.5V to 0V, within +1mA			
Operation configuration	High when mark is detected.			ON when mark is detected.
Protection circuit	Power supply reverse polarity protection, output short-circuit protection and output incorrect connection protection			
Response time	Operate or reset : 50μs max. for each (2-point teaching mode) Operate or reset : 150μs max. for each (1-point teaching mode)			
Sensitivity adjustment	Teaching method			
Ambient illumination	Incandescent lamp: 3,000 lx max.			
Ambient temperature	Operating:-10 to +55°C, Storage:-25 to +70°C (no freezing and condensation)			
Ambient humidity	Operating:35 to 85%RH, Storage:35 to 95%RH			
Insulation resistance	20MΩ min.(at 500VDC)			
Dielectric strength	1000 VAC 50/60 Hz 1min			
Vibration resistance	10 to 55 Hz 1.5-mm double amplitude or 100 m/s <sup>2</sup> 2 hours each in X, Y, and Z directions			
Shock resistance	500m/s <sup>2</sup> 3 times each in X, Y, and Z directions			
Degree of protection	IEC60529 : IP67			
Connection method	M12 4-pole Connector type (M12, 4-pin)			
Indicator	Operation indicator (Orange), RUN indicator (Green), 7-segment indicator (White), Key lock indicator (White), Timer indicator (White), 1-point teaching mode indicator (White)			
Material	Case	Diecast zinc (nickel-plated brass)		
	Lens	PMMA		
	Lens cover	ABS		
	Display	ABS		
	Button	Elastomers		
	Connector	Diecast zinc (nickel-plated brass)		
Accessories	Instruction Sheet, Compliance Information Sheet			
Major IO-Link functions ([ : factory shipment setting)	· Operation mode switching between NO and NC [NO] · Timer function of the control output and timer time selecting function (Select a function from disabled, ON delay, OFF delay, one-shot or ON/OFF delay.) [Disabled] (Select a timer time of 1-5000ms) [10ms] · Selecting function of ON delay timer time for instability (0 (disabled)-1000ms) [Disabled] · Monitor output function (PD output indicating a relative detection quantity) · Energizing time read-out function (unit: h) · Initialize the settings function "Restore the factory settings"			—
IO-Link communications specification	IO-Link specification	Ver1.1		—
	Transmission speed	E3S-DCP21-IL3 : COM3 (230.4kbps) E3S-DCP21-IL2 : COM2 (38.4kbps)		—
	Data length	PD size : 8byte		—

#### 4-3 Time Chart

E3S-DCP21-IL3/IL2 (Push-pull output)

Inversion of operational logic, output delay and input/output can be switched with IO-Link communication.

Output mode	NO/NC setting *It can be switched in IO-Link	Time Chart
Standard I/O mode (Pin2 Output Settings)	NO *Default	
	NC	
IO-Link mode (Pin2 Output Settings)	NO *Default	
	NC	

E3S-DCN21 (NPN output)

Time Chart	Sensing object	Background	Mark
	RUN indicator (Green)	Lighting	
	Operation indicator (Orange)	Not Lighting	Lighting
	Pin4 output (NO)	OFF	ON
	Load current	OFF	ON

#### Suitability for Use

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.
